

## Children's participation in medical procedures

The overall purpose is to study and develop support for children's participation in health care. Several sub-projects are focusing on children's participation in the primary prevention of health care processes within health care and during transitions between different care processes, age groups and health care units.

### Project time span

2013 - 2017

### Funding

Region Halland

Barncancerfonden

Stig Thunes Stiftelse

Svensk Sjuksköterskeförening
