

## Offline file access Windows 10

If connecting to JU from off campus for the first time, then open **Software Center** and search for **Cisco AnyConnect Secure Mobility Client**. Install it by clicking on the icon.

When installed, the application can be started from the Start menu.

Enter **vpn.hj.se** and click “connect”.

Log in with your JU user name and password.

When connected, this icon is shown.

To reconnect, either right click the icon shown above or start the application from the start menu.

**Connecting to your home folder G: or the shared folder L:**

After connecting with VPN, click on the appropriate icon, “Personal JU Files” for G: and “Common JU Files” for L:
