

JÖNKÖPING UNIVERSITY  
School of Engineering

## Welcome to the master's programme Sustainable Building Information Management

This master's programme aims to develop the knowledge, skills and experience needed to use and manage modern digital technologies, for example BIM and GIS in the built environment sector to create sustainable values. This includes modelling, simulation, analysis, optimization, visualization, sharing, communicating and managing information, processes and organizations.

To be able to follow the programme you must have some basic knowledge about BIM and BIM-based software's, for example AUTODESK REVIT. To be prepared **we strongly recommend** you to carry out the exercises on the BEGINNER level found at:

<https://academy.autodesk.com/software/revit>

If you have any questions concerning the programme please do not hesitate to take contact me.

Sincerely

[Peter Johansson](#) Ph. D.

Programme Manager [Sustainable Building Information Management](#)

[Department of Construction Engineering and Lighting Science](#), School of Engineering, Jönköping University, Sweden
