

# COURSE SYLLABUS Mechanics related to Prosthetics and Orthotics, 7.5 credits

Mechanics related to Prosthetics and Orthotics, 7,5 högskolepoäng

Course Code: Confirmed by: Valid From:	HMPG18 Utbildningsrådet Nov 28, 2017 Dec 10, 2018	Education Cycle: Disciplinary domain:	First-cycle level Technology
Version: Reg number:	1 2018/159 (313) Department of Rehabilitation	Subject group: Specialised in: Main field of study:	MT2 G1N Prosthetics and Orthotics

## Intended Learning Outcomes (ILO)

Upon completion of the course the student should have the ability to:

Knowledge and understanding

- explain elementary functions and their properties
- · explain vectors and the basic calculations which are required to define them
- · show familiarly with the concepts eigenvalues and eigenvectors
- explain the basics of statics and dynamics
- explain central concepts within mechanics use as force, energy and momentum.

Skills and abilities

- · solve equations and algebra expressions containing elementary functions
- use vectors and vector calculations to solve geometrical problems in two and three dimensions
- show knowledge of free body diagrams and express mechanical equilibrium for a system
- use equations to solve rigid-body calculations
- account for and discuss mechanical problems and solutions.

Judgement and approach

- · show ability to choose appropriate strategies for solutions
- show ability to see if a solution is within reason.

#### Contents

Mathematics:

- derivatives
- integrals
- differential equations
- trigonometric functions
- vectors

Mechanics:

- classical mechanics, force, static equilibrium, free body diagram

- center of mass
- kinematics, speed, acceleration, movement in cartesian coordinates
- Kinetics, Newton's laws of motion
- power, work, energy

## Type of instruction

The course is implemented through lectures, group work and seminars.

The teaching is conducted in English.

#### Prerequisites

General entry requirements.

#### Examination and grades

The course is graded A, B, C, D, E, FX or F.

Examination of the course will be based upon one written examination.

A university lecturer serves as examiner for the course.

Registration of examination:

Name of the Test	Value	Grading
Written examination	7.5 credits	A/B/C/D/E/FX/F

## Other information

During the course attendance is compulsory during group work and seminars.

## **Course literature**

Course literature is set one month before the start of the course.
