Version:	12	Main field of study:	Social Work

Intended Learning Outcomes (ILO)

Upon completion of the course the student should have the ability to

Knowledge and understanding

- elaborate on theories and methods for community work with groups in a national and international context
- describe inclusionary and exclusionary structures on group and society level.

Skills and abilities

- apply and reflect upon theories and methods for promoting social change in groups and societies
- analyze social problems and identify, plan and propose interventions for groups and communities together with service users and stakeholders
- apply and reflect upon participatory research methods in community work.

Judgement and approach

- critically reflect upon how social conditions affect living conditions for different groups in society
- critically reflect upon the social worker's role and the significance of cooperation with non-government organisations in social work with groups and communities from a national and international perspective
- Reflect upon the prerequisites for service user participation in development of interventions in social work.

Contents

- social work with groups and communities such as outreach work, preventive work, community work, social entrepreneurship, anti-discriminatory work, advocacy and empowerment
- participation and inclusion and their meaning for social work practice
- mobilisation of citizens and non-government organisations engagement in social work
- methods for developing and running projects and other forms of collaboration
- participatory research
