

COURSE SYLLABUS

Advanced Research Methods in Entrepreneurship, 7.5 credits

Advanced Research Methods in Entrepreneurship, 7,5 högskolepoäng

Course Code: JARR26	Education Cycle: Second-cycle level
Confirmed by: Council for Undergraduate and Masters Education Feb 25, 2016	Disciplinary domain: Social sciences (70%) and technology (30%)
Valid From: Aug 22, 2016	Subject group: FE1
Version: 1	Specialised in: A1N
Reg number: IHH 2016/1162-313	Main field of study: Business Administration

Intended Learning Outcomes (ILO)

On completion of the course the students will be able to:

Knowledge and understanding

1. explain different perspectives and methods in business administration with emphasis on entrepreneurship research
2. recognize frameworks/methods to research philosophy

Skills and abilities

3. identify and formulate a research problem in entrepreneurship
4. select an appropriate method for data collection and data analysis
5. collect relevant empirical material
6. assess qualitative and quantitative analysis by applying appropriate methods and techniques
7. develop a scientific report and present results

Judgement and approach

8. evaluate an empirical study in terms of ethics
9. evaluate the possibilities and limitation of science/research
10. critically review literature in entrepreneurship, including the use of concepts and models

Contents

The overall objective is to develop knowledge and understanding of scientific research methods in business administration and to provide skills to design and accomplish a research project in entrepreneurship, performing analyses using qualitative and quantitative research methods and to communicate the results. Furthermore, the student should be able to reflect on research outcomes based on methodological and philosophical approaches.

The content reflects the various steps taken in a scientific investigation:

- critically reviewing literature and relating it to the research project at hand,
- choosing research strategy,

- considering ethical aspects of research strategy,
- defining sample/cases and applying quantitative and/or qualitative methods for collecting, expressing and analysing empirical material,
- presenting the results,
- relating frameworks, methods and results to research philosophy.

During the course, students will produce a literature review, develop and carry out their own research projects, present a scientific report in entrepreneurship and critically discuss the scientific contribution of other students.

Type of instruction

Lectures, seminars, student presentations and writing reports.

The teaching is conducted in English.

Prerequisites

Bachelor's degree in Business Administration (i.e the equivalent of 180 credits at an accredited university) or equivalent..

Examination and grades

The course is graded A, B, C, D, E, FX or F.

ILO assessed through examination:

Literature Review. Value: 1.125 credits. ILO10

Research Report (pt.1). Value: 1.5 credits. ILO3; ILO4; ILO7; ILO8; ILO9

Quantitative Analysis. Value: 0.75 credits. ILO6; ILO7

Multiple Choice Questions, Value: 1.125 credits. ILO1; ILO2

Exam, Value: 3 credits. ILO1; ILO2; ILO9

To pass the course, students must pass each examination element. The final grade is based on the combined result of all tests. The course is examined both individually and in group.

Registration of examination:

Name of the Test	Value	Grading
Examination ¹	7.5 credits	A/B/C/D/E/FX/F

¹ Determines the final grade of the course, which is issued only when all course units have been passed.

Course evaluation

It is the responsibility of the examiner to ensure that each course is evaluated. At the outset of the course, evaluators must be identified (elected) among the students. The course evaluation is carried out continuously as well as at the end of the course. On the completion of the course the course evaluators and course examiner discuss the course evaluation and possible improvements. A summary report is created and archived. The reports are followed up by program directors and discussed in program groups and with relevant others (depending on issue e.g. Associate Dean of Education, Associate Dean of faculty, Director of PhD Candidates,

Dean and Director of Studies). The next time the course runs, students should be informed of any measures taken to improve the course based on the previous course evaluation.

Other information

Academic integrity

JIBS students are expected to maintain a strong academic integrity. This implies to behave within the boundaries of academic rules and expectations relating to all types of teaching and examination. Copying someone else's work is a particularly serious offense and can lead to disciplinary action. When you copy someone else's work, you are plagiarizing. You must not copy sections of work (such as paragraphs, diagrams, tables and words) from any other person, including another student or any other author. Cutting and pasting is a clear example of plagiarism. There is a workshop and online resources to assist you in not plagiarizing called the Interactive Anti-Plagiarism Guide. Other forms of breaking academic integrity include (but are not limited to) adding your name to a project you did not work on (or allowing someone to add their name), cheating on an examination, helping other students to cheat and submitting other students work as your own, and using non-allowed electronic equipment during an examination. All of these make you liable to disciplinary action.
