Judgement and approach

- critically reflect upon and problematize globalization theory, media globalization theory and global journalism theory from different perspectives

Contents

- Globalization theory (including theories about de-globalization)
- Media globalization theory
- Global journalism theory

Type of instruction

The teaching consists of lectures, seminars and exercises performed individually and in groups.

A learning management system is used.

Students who have been admitted to and registered for a course have the right to receive instruction/supervision for the duration of the time period specified for the particular course

instance to which they were accepted. After that, the right to receive instruction/supervision expires.

The teaching is conducted in English.

Prerequisites

45 credits from the master's programme, or equivalent.

Examination and grades

The course is graded A, B, C, D, E, FX or F.

The grades A, B, C, D and E are all passing grades. For courses with more than one element of examination, students are given a final grade based on an overall assessment of all the elements included in the course.

The examination is based on the intended learning outcomes.

The course is examined through one group assignment and one individual written assignment.

The examination must allow for students to be assessed on an individual basis. Further information concerning assessment of specific intended learning outcomes and grading criteria is provided at the beginning of the course.

To receive the final grade of this course, the student needs to pass all of the examinations. In order to achieve grade A in the course, the student should have an A in the individual written assignment. A similar rationale is applied on the other grading levels.

Students are guaranteed a minimum of three attempts to pass an examination, including the regular attempt.

If a student has failed the same examination three times, the student can request that the next attempt be graded by a new examiner. The decision to accept or reject such a request is made by the associate dean of education. A student may not make a second attempt at any examination already passed in order to receive a higher grade.

In case a course is terminated or significantly altered, examination according to the earlier syllabus shall be offered on at least two occasions in the course of one year after the termination/alteration.

Registration of examination:

Name of the Test	Value	Grading
Group assignment [†]	2 credits	U/G
Individual written assignment	5.5 credits	A/B/C/D/E/FX/F

¹ The assignment is assessed as Fail (U) or Pass (G).

Course evaluation

The instruction is followed up throughout the course. A course evaluation is conducted at the end of the course. A summary and comments are published in the learning management system. The evaluation constitutes a basis for future improvements to the course.
