Judgement and approach

- evaluate the mediating role of the environment in a child's everyday functioning and participation
- evaluate inclusion and participation as a framework in childhood interventions

Contents

The course provides an introduction to

- Children's functioning and children in need of special support
- Systems theory and a bio-psycho-social model for assessment and intervention
- Risk, prevention, and resilience
- Inclusion and participation
- Philosophies, orientation and constructs in childhood interventions in an international perspective
- Theoretical perspectives on interventions in childhood
- Research on children in need of special support
- Ethical considerations in childhood

Type of instruction

The teaching consists of lectures, seminars and exercises performed individually or in groups.

A digital learning platform is used.

Students who have been admitted to and registered on a course have the right to receive instruction/supervision for the duration of the time period specified for the particular course to which they were accepted. After that, the right to receive instruction/supervision expires.

The teaching is conducted in English.

Prerequisites

The applicant must hold the minimum of a bachelor's degree (i.e. the equivalent of 180 ECTS credits at an accredited university) within health and caring sciences, behavioural science, social work, or educational sciences, including independent, theoretical based work- i.e. a thesis or equivalent. Proof of English proficiency is required.

Examination and grades

The course is graded A, B, C, D, E, FX or F.

The grades A, B, C, D and E are all passing grades. For courses with more than one examination, students are given a final grade based on an overall assessment of all examinations included in the course. The final grade of the course is issued only when all course units have been passed.

The examination is based on instruction and course literature.

The examination must allow for students to be assessed on an individual basis. Students may not make a second attempt at any examination (or element of examination) already passed in order to receive a higher grade. Further information concerning assessment and grading criteria is provided in a study guide distributed at the beginning of the course.

Students are guaranteed a minimum of three examination occasions, including the regular occasion.

If a student has failed the same examination three times, the student is entitled to request that the next examination is assessed and graded by a new examiner if possible. The decision to accept or reject such a request is made by the vice dean of education.

In case the course is terminated or significantly altered, examination according to the present course syllabus shall be offered on at least two occasions in the course of one year after the termination/alteration.

Mandatory module assignments (four), such as papers and presentations, are graded as Pass or Fail.

At the end of the course, the students will be examined by one individual paper that will also be presented orally (graded A-F).

Registration of examination:

| Name of the Test | Value | Grading |
|------------------|------------|----------------|
| Examination | 15 credits | A/B/C/D/E/FX/F |

Other information

The course requirements are to follow streamed lectures, read required literature, deliver written assignments on time, contribute to group papers and presentations, and participate actively in seminars.

The course is provided in half pace. It is structured as off-campus studies individually and in group, in addition to two mandatory seminar days at campus each month. The structure of the course requires students to work independently. As a digital e-learning system is used, access to computer and computer experience are of importance.
