### Intended Learning Outcomes (ILO)

After completing the course, the student shall:

Knowledge and understanding

- Demonstrate knowledge about the history of Western architecture and development of building technology, with a focus on the period after the year 1900
- Demonstrate knowledge about material, detailing and building technology, typical for different periods
- Show understanding for how political, economical, aesthetical and social factors influence our attitudes towards the built environment

### Contents

This course gives a brief overview of the history of architecture and the development of building technology in the Western world, from antiquity to modern times. The focus is on the period after the year 1900.

The course includes:

The historical development of the built environment, from antiquity until the year 1900, divided in style periods

The history of modern architecture, from the year 1900

The development of building technology

Tradition and renewal

Materials and detailing

### Type of instruction

Lectures and city walk

The teaching is conducted in English.

### Prerequisites

General entry requirements and completed course Built Environment, 9 credits (or the

equivalent).
