

## COURSE SYLLABUS

# Analyses, Simulations and Assessment systems, 7.5 credits

*Analyses, Simulations and Assessment systems, 7,5 högskolepoäng*

---

<b>Course Code:</b> TASR21	<b>Education Cycle:</b> Second-cycle level
<b>Confirmed by:</b> Dean Mar 1, 2021	<b>Disciplinary domain:</b> Technology
<b>Revised by:</b> Director of Education Jun 2, 2021	<b>Subject group:</b> BY1
<b>Valid From:</b> Aug 1, 2021	<b>Specialised in:</b> A1N
<b>Version:</b> 2	<b>Main field of study:</b> Product Development

---

### Intended Learning Outcomes (ILO)

After a successful course, the student shall:

Knowledge and understanding

- show familiarity with the concept of BIM in practice
- display knowledge of the most common systems and methods of assessing sustainability within the field of Built Environment
- demonstrate comprehension of the concept of multicriteria decision making

Skills and abilities

- demonstrate skills to modify and develop BIM models for sustainability analyses and simulations
- demonstrate the ability to use BIM based tools and software to perform sustainability analyses and simulations

Judgement and approach

- demonstrate the ability to apply different BIM based sustainability assessment systems and tools for a sustainable built environment
- demonstrate the ability to identify, analyze, simulate, and evaluate vital building performance criteria from a sustainability aspect

### Contents

The course focuses on the concept of BIM, sustainability assessment systems and creation of BIM models to perform analyses and simulations for buildings' sustainability and performance assessments.

The course includes the following elements:

- The concept of BIM
- Sustainability assessment systems
- BIM based sustainability assessment tools and software
- Design Authoring

## Type of instruction

Instruction is conducted through lectures, exercises, and project work. A limited number of guest lectures in Swedish can occur.

The teaching is conducted in English.

## Prerequisites

The applicant must hold the minimum of a bachelor's degree (i.e the equivalent of 180 ECTS credits at an accredited university) with at least 90 credits in construction engineering or civil engineering, or equivalent. The bachelor's degree should comprise a minimum of 15 credits in mathematics. Proof of English proficiency is required.

## Examination and grades

The course is graded 5,4,3 or Fail.

The final grade will only be issued after satisfactory completion of all assessments.

Registration of examination:

Name of the Test	Value	Grading
Project <sup>1</sup>	4.5 credits	5/4/3/U
Exercises	3 credits	U/G

<sup>1</sup> Determines the final grade of the course, which is issued only when all course units have been passed.

## Course literature

The literature list for the course will be provided 8 weeks before the course starts.

The BIM-Manager: A Practical Guide for BIM Project Management, Mark Baldwin, by buildingSMART, 2019.

The book is available at the JU's library.

Climate Crisis and the Global Green New Deal - Bound, English, 2020. Author: Noam Chomsky

The book is available at the JU's library.

Internationalism or Extinction - Bound, English, 2019, Author: Noam Chomsky

The book is available at the JU's library.
