

COURSE SYLLABUS

Globalisation of Economic Activity, 7.5 credits

Globalisation of Economic Activity, 7,5 högskolepoäng

Course Code:	JGER27	Education Cycle:	Second-cycle level
Confirmed by:	Council for Undergraduate and Masters Education Dec 19, 2016	Disciplinary domain:	Social sciences (75%) and natural sciences (25%)
Valid From:	Jan 16, 2017	Subject group:	NA1
Version:	1	Specialised in:	A1N
Reg number:	IHH 2016/5133-313	Main field of study:	Business Administration, Economics

Intended Learning Outcomes (ILO)

On completion of the course the student will be able to:

Knowledge and understanding

1. recommend strategies, structures, and practices for a multinational company to best manage the different and changing global environment in each nation where it does business
2. discuss the foundations and developments of contemporary economic and business issues in a global context

Skills and abilities

3. analyze independently how contemporary globalization issues have developed in different contexts
4. apply research-based literature to describe and analyze particular aspects of globalization process related to own projects

Judgement and approach

5. display a reflective approach to the role of theory in contemporary global economy, and in particular theories of foreign direct investments (FDI)
6. independently define and treat a relevant question based on relevant theories and practices
7. analyze the subject from relevant scientific, societal and ethical aspects
8. exhibit an understanding of the role of knowledge in society and the individual's responsibilities when it comes to the use of this knowledge

Contents

This course provides an understanding of the evolution of foreign direct investment and the multinational corporation (MNC). Introduction to multinationality with focus on the RBV (capabilities and core competencies). Discussion of Barney's VRIN attributes and the concept of dynamic capabilities is methodically embedded in the general structure of the course.

Departing from the RBV of the firm, the concept and the degree of multinationality (i.e., the degree of international presence and commitment) is analyzed in relation to chosen case

companies. Classical descriptions of MNC organizational structures (the M-form and other, newer organizational forms) are discussed.

Special emphasis is placed on the way the modern MNC organizes its activities and how this determines their relations with other firms. This set of lectures departs from two theories (transaction cost economics and network theory), which describe relationships among actors. The two theories are discussed in relation to the MNC, and its organizing and internationalization processes. Innovation will be considered from several perspectives, including the diffusion of innovations and innovation management for competitive advantage. Evolutionary perspective on the technological change are presented. Cross-sectoral and cross-regional patterns of globalization are identified. The benefits and complications of IT in globalized economy and the role of IT in MNCs are discussed.

A separate set of lectures defines the basic concepts of institutional theory. The focus here is on institutional theory and legitimacy. Specific features of multinationals from emerging economies, similarities and differences with MNCs from developed countries. Positive and negative effects of globalization are viewed in terms of environment, MNC corporate social responsibility and general income distribution effects.

Type of instruction

Lectures and seminars

The teaching is conducted in English.

Prerequisites

Bachelor's Degree in Business or Economics (i.e the equivalent of 180 credits at an accredited university) (or the equivalent).

Examination and grades

The course is graded A, B, C, D, E, FX or F.

ILOs 1-8 are examined in the group project (accounts for 60% of the course)

ILOs 5-8 are examined in the written assignment (accounts for 40% of the course)

Both project and assignment will be assessed individually.

Registration of examination:

Name of the Test	Value	Grading
Examination ¹	7.5 credits	A/B/C/D/E/FX/F

¹ Determines the final grade of the course, which is issued only when all course units have been passed.

Course evaluation

It is the responsibility of the examiner to ensure that each course is evaluated. At the outset of the course, evaluators must be identified (elected) among the students. The course evaluation is carried out continuously as well as at the end of the course. On the completion of the course the

course evaluators and course examiner discuss the course evaluation and possible improvements. A summary report is created and archived. The reports are followed up by program directors and discussed in program groups and with relevant others (depending on issue e.g. Associate Dean of Education, Associate Dean of faculty, Director of PhD Candidates, Dean and Director of Studies). The next time the course runs, students should be informed of any measures taken to improve the course based on the previous course evaluation..

Other information

Academic integrity

JIBS students are expected to maintain a strong academic integrity. This implies to behave within the boundaries of academic rules and expectations relating to all types of teaching and examination.

Copying someone else's work is a particularly serious offence and can lead to disciplinary action. When you copy someone else's work, you are plagiarizing. You must not copy sections of work (such as paragraphs, diagrams, tables and words) from any other person, including another student or any other author. Cutting and pasting is a clear example of plagiarism. There is a workshop and online resources to assist you in not plagiarizing called the Interactive Anti-Plagiarism Guide.

Other forms of breaking academic integrity include (but are not limited to) adding your name to a project you did not work on (or allowing someone to add their name), cheating on an examination, helping other students to cheat and submitting other students work as your own, and using non-allowed electronic equipment during an examination. All of these make you liable to disciplinary action.
