Forget Network on a PC.

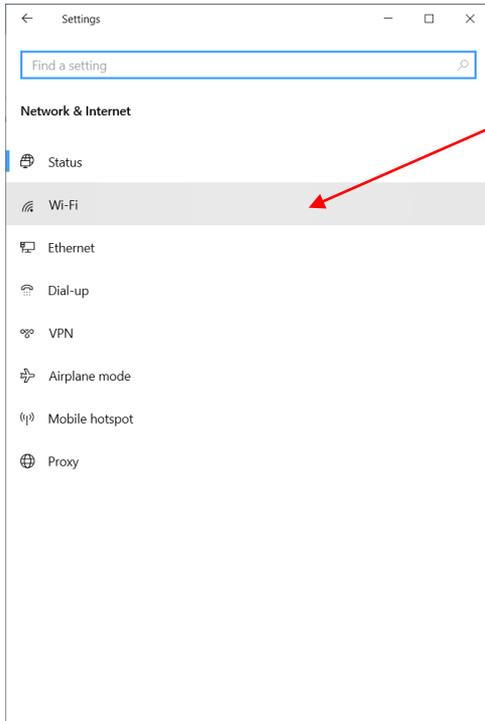

Click on the networks icon.

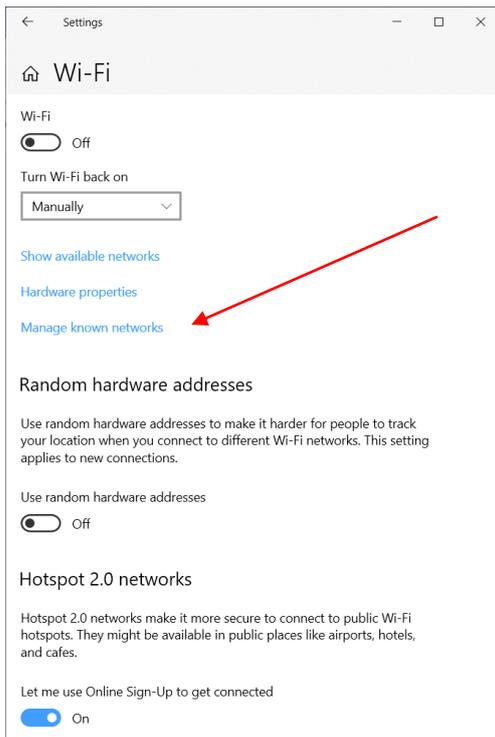

Go to Network & Internet settings

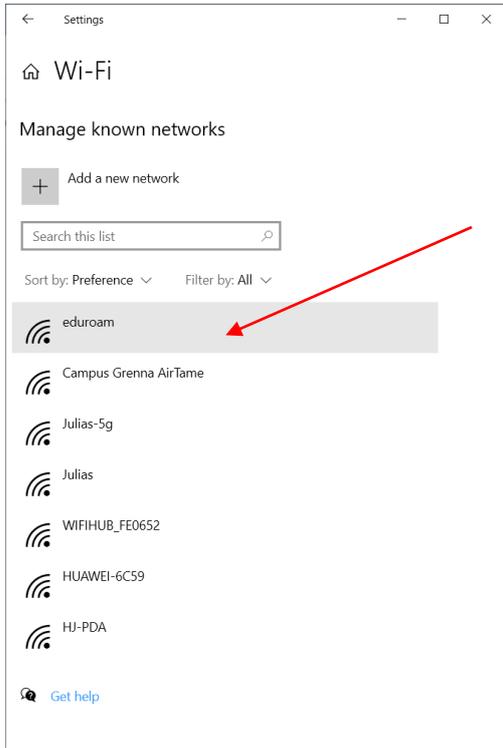

Find Wifi on the Menu.

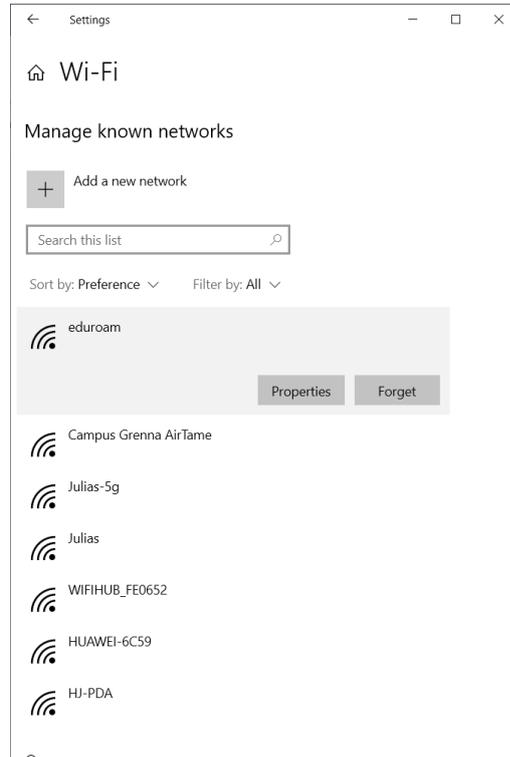

And then Manage known networks.

Find Eduroam.

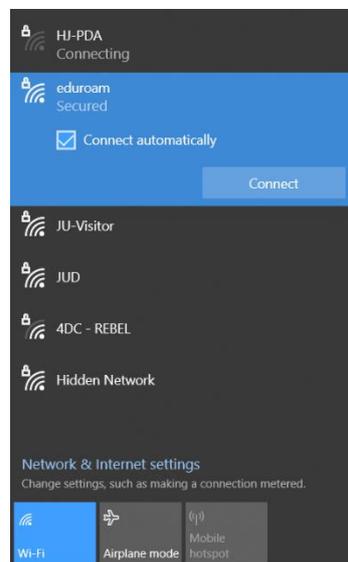

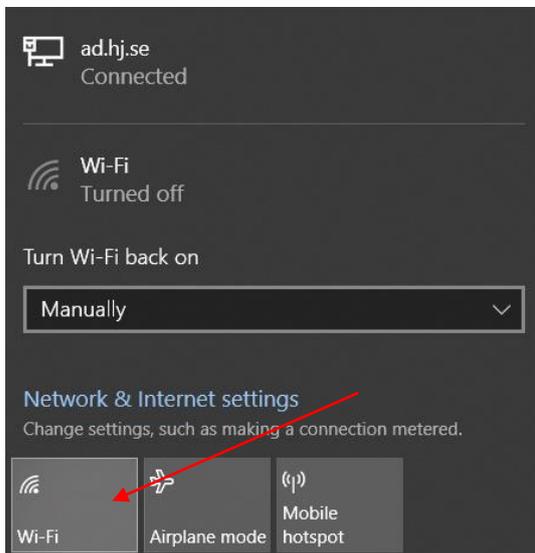

Click Forget.

Logg in to Wifi (Eduroam)

You need to diconnect the computer from the dockingstation or Networkscable to be able to activate Wifi and connect to Eduroam.

Username should look like this.

""username"@ju.se

Eduroam Password (is exactly 7 characters)

Password can be changed on myaccount.ju.se > login and there is a page for Eduroam where you can set a new password.
