

OPEN ACCESS AGREEMENTS FOR SWEDEN

Selected BIBSAM institutions have open access (OA) agreements with Springer Nature, meaning that corresponding authors affiliated with participating institutions may be eligible to publish their articles open access at no cost to them. The agreements include more than 600 fully OA journals and 1,850 hybrid journals across the Springer Nature portfolio.

If you're affiliated with a participating Swedish institution, you may be eligible to publish open access in our journals at no cost to you.

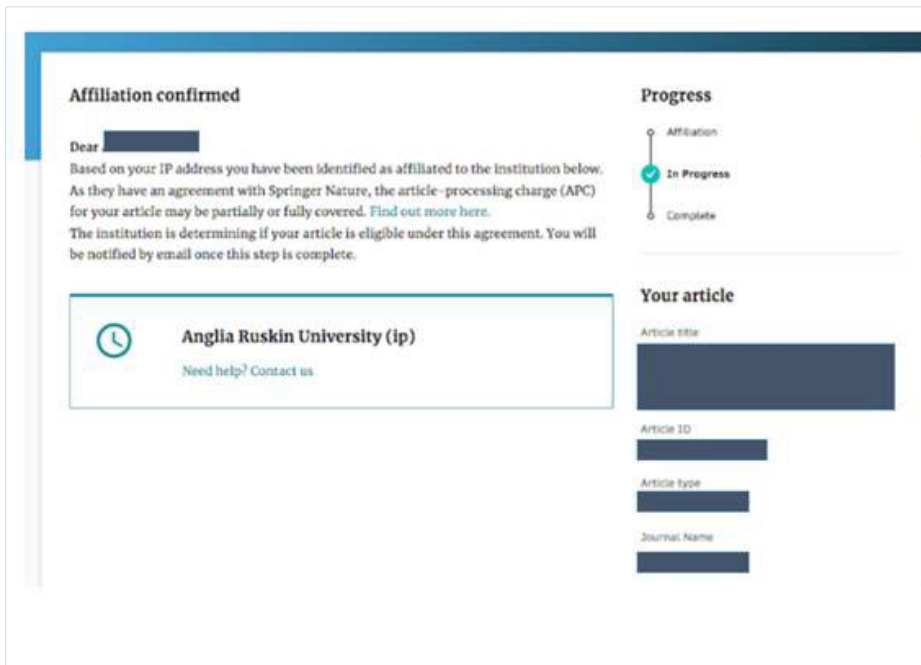

Once your article has been accepted for publication, as corresponding author you will be sent a link to an eligibility checker, where you will be asked to confirm your institutional affiliation. To ensure rapid publication of your article, it is important to confirm your affiliation as soon as possible. Once you have confirmed your affiliation, Springer Nature and your institution will confirm your article's eligibility and you will be notified when your article has been approved.

There are 3 ways that we can recognise your eligibility for coverage under the agreement:

The corresponding author is the author who handles the manuscript and correspondence during the publication process. The corresponding author has the authority to act on behalf of all co-authors in all matters pertaining to publication of the manuscript, and acts as the point of contact for any enquiries after the paper has been published.

1. Selected institution	2. Institutional email	3. Location
This is the easiest way to be recognised. Please type the full name of your institution in English in the 'Enter your affiliation' box. If you have more than one affiliation, please check the list of eligible institutions and enter your eligible affiliation. You can still have multiple affiliations listed in your published article.	If you use your institutional email address, you will be automatically recognised as eligible to publish open access under your institution's agreement.	If you submit from within your institution's IP range, you will be recognised as eligible based on your location. It is always best to submit from your institution's network.

If you have been recognised as eligible in any of the ways above, you will see a page similar to the one below:

The screenshot displays a user interface for article submission. On the left, under 'Affiliation confirmed', it addresses the user as 'Dear [redacted]' and explains that based on their IP address, they are affiliated with Anglia Ruskin University (ip). It mentions that the article-processing charge (APC) may be partially or fully covered and that the institution is determining eligibility. A 'Need help? Contact us' link is provided. On the right, a 'Progress' section shows a vertical timeline with three steps: 'Affiliation' (not completed), 'In Progress' (checked), and 'Complete'. Below this, the 'Your article' section lists fields for 'Article title', 'Article ID', 'Article type', and 'Journal Name', all of which are redacted with black boxes.

When your article has been approved by your institution, you will be notified via email.
