# UR International Scientific Conference Week 2017

## Background

The University of Rwanda (UR) has organized the First Research Conference Week from 14th -16th June 2017. The UR is the largest higher learning institution and the only public University in Rwanda. Apart from being mandated to offer both undergraduate and postgraduate training, the UR undertakes high quality research in a wide diversity of disciplines usually jointly with internationally recognized universities and research organizations. The aspiration of the UR is to become a research led institution with international standing as well as local relevance contributing to the socio-economic transformation of Rwanda. To achieve that the UR embraces the Sustainable Development Goals (SDGs 2030), the Economic Development and Poverty Reduction Strategy (EDPRS II, the Rwanda Higher Education Policy (2008) and Rwanda Education Sector Strategic Plan 2013-2018 (ESSP, 2013) all of which expressly show that the UR and similar institutions have a significant role to play in their attainment through contributing to evidence based policy development from the research and innovation activities by producing of market ready graduates as well as through community engagements.

In a bid to achieve the goal of knowledge dissemination and sharing widely the impact the vast research knowledge already generated and practical experiences have made to the society, UR organized a research conference at which the researchers will share their findings and experiences as well as establish networks with participants. Through such networks it is hoped that there will be increased impact and internationalization of the research outputs and the charting out of relevant new directions in their research and innovation endeavors.

## Rebranding Research for Sustainable Development

University of Rwanda, Kigali  
Conference and Exhibition Village, 14-16 June, 2017

### Purpose of the Conference

The purpose of the UR First Research Conference Week is to bring together the researchers, innovators, educators, various practitioners in different professions, students and other stakeholders to share their findings, experiences, and hold discussions on how resolve met challenges. The conference seeks to establish new collaborations for enhanced synergies that will lead to increased impactful outputs.

This conference provides an opportunity for scholars and stakeholders to reconsider the role of research in socio-economic transformation. In addressing the context of national and global developmental goals especially the SDGs, the UR aims to become both local in context and at the same time globally relevant. This conference is expected to bring together over 500 participants from around the world while over 100 papers are expected to be presented.

## Conference themes

- Re-positioning Arts, Humanities and Social Sciences for sustainable Development.
- Climate Change, Resilience and Nutritional Security in Farming Systems.
- East Africa Business and Economic Watch: Perspectives on Rwanda from 2020 to 2050.
- Educational Research for Sustainable Development.
- Mathematical Statistic and Applications.
- Research for population health and prosperity.
- Addressing biodiversity loss, ecosystem services, and protected areas conservation: human and natural systems perspectives.
