*Sustainable Communication (Two Years), 120 högskolepoäng*

---

**Programme code:** LAS29

**Programmestart:** Autumn 2019

**Confirmed by:** Dean 2018-10-18

**Education Cycle:** Advanced level

**Version:** 1

**Reg number:** VD-beslut §18/130

---

#### **Title of qualification**

Degree of Master of Social Science (120 credits) with a major in Media and Communication Science

#### **Programme overview**

The masters programme Sustainable Communication (Two Years) provides a deepened education in the field of media and communication for students already holding a bachelor degree and having a substantial amount of media and communication studies in their undergraduate studies. The master's programme prepares students for the possibilities to apply for further education on third cycle, i.e. doctoral programmes.

One academic year consists of 40 study weeks, divided in two semesters. This is equivalent to 60 credits (60 hp). Each study week consists of 1.5 credits (1,5 hp) that correspond to 40 hours of study.

The programme has a special focus on sustainability in relation to media and communication. The workings of the media, both digital and traditional, and the ways public and private organizations communicate within society, are conceived as having an important impact for the achievement of environmental, social and economic sustainability. Closely related to this approach, are also perspectives that focus on media and communication in relation to globalization and development. The program approaches this focus from a theoretical, methodological and communication professional point of view. The master programme prepares the students for the possibilities to apply for further education on second and third cycles.

The programme offers theoretical courses in a total of 67.5 credits, aiming at deepening the student's knowledge on media and communication in relation to sustainability, globalization and development, two 7.5-credit courses in methods with the aim of fostering a reflective scientific approach, a 7.5-credit work placement course aiming to develop the students' professional communication skills, and two 15-credit thesis courses. The theses projects in media and communication should cover a topic that is closely related to sustainable communication. Each course has its own syllabus with specific prerequisites. The organisation of the courses follows a logic progression.

All courses are taught in English.

#### **Objectives**

*General aims*

Second cycle education shall essentially build on the knowledge students acquire in first cycle education or corresponding knowledge. Second cycle education shall involve a deepening of knowledge, skills and abilities relative to first cycle education and, in addition to what applies to first cycle education, shall;

- further develop the students' ability to independently integrate and use knowledge
- develop the students' ability to deal with complex phenomena, issues and situations
- develop the students' potential for professional activities that demand considerable independence or for research and development work

*Programme specific learning goals*

Specific learning goals for the programme are the following: to deepen the student's understanding about the role that media and communication play in the processes to obtain environmental, social and economic sustainability, and gender equality, to be able to apply this knowledge as a communication professional or in future doctoral studies.

In accordance with the learning outcomes stated in the Higher Education Ordinance (SFS) No. 2014:1096, students shall demonstrate the following:

*Knowledge and Understanding*

- demonstrate knowledge and understanding in media and communication, including both broad knowledge of the field, and specialized knowledge about media and communication in the contexts of sustainability, globalization and development, as well as insights into current research and development work, and
- demonstrate specialised methodological knowledge in media and communication

*Skills and abilities*

- demonstrate the ability to identify, and to critically and systematically integrate knowledge needed for understanding communicative processes and expectations through perspectives related to sustainability, and to analyse, assess and deal with complex phenomena, issues and situations in this context, even with limited information
- demonstrate the ability to critically and independently use theories and methods to analyse and assess complex phenomena regarding, media and communication in a sustainability context
- demonstrate the ability to identify and formulate issues concerning media and communication and sustainability critically, autonomously and creatively as well as to plan, and using appropriate methods, undertake advanced tasks within predetermined time frames and so contribute to the formation of knowledge as well as the ability to evaluate this work
- demonstrate the ability in speech and writing both nationally and internationally to clearly report and discuss his or her conclusions and the knowledge and arguments on which they are based in dialogue with different audiences, and
- demonstrate required skills for participation in work concerning research and development or autonomous employment in some other qualified capacity

*Judgement and Approach*

- demonstrate the ability to make assessments in media and communication informed by relevant disciplinary, social and ethical issues and also to demonstrate awareness of ethical aspects of research and development work
- demonstrate insight into the possibilities and limitations of research, its role in society and the responsibility of the individual for how it is used, and
- identify the personal need for further knowledge and take responsibility for his or her ongoing learning

## Contents

### Mandatory Courses

#### Semester 1

Sustainability and Communication, 15 credits

Media in the Digital Age, 7.5 credits

Transmedia Storytelling and Design, 7.5 credits

#### Semester 2

Media and Communication Research Methods 1, 7.5 credits

Work Placement in Communication, 7.5 credits

Master Thesis in Media and Communication 1, 15 credits

#### Semester 3

Globalization and Media, 7.5 credits

Global Crisis Communication, 7.5 credits

Communication for Development, 7.5 credits

Global Cultural Studies, 7.5 credits

#### Semester 4

Media and Communication Research Methods 2, 7.5 credits

Individual Literature Course, 7.5 credits

Master Thesis in Media and Communication 2, 7.5 credits

## Teaching and examination

To pass a course, the student needs to fulfil all the course requirements. Examination takes place in the form of written exams, oral exams or term papers. Different methods of examination can be used within a single course. The student will be offered at least three examination opportunities in each examination period. The university is not obligated to offer re-exams in courses that a student already has passed. Mandatory workshops and assignments can exist within a course.

The courses within the programme are graded A-F or Pass (G)/Fail (U). Grades A-E all constitute passing grades and grades FX and F are equal to Fail. For most workshops and mandatory group assignments, only Pass (G) or Fail (U) is given.

## Prerequisites

The applicant must hold the minimum of a bachelor's degree (i.e. the equivalent of 180 ECTS credits at an accredited university) with at least 90 ECTS credits in media and communication studies, including independent, theoretical based work, i.e. a thesis or the equivalent. English 6/English B in the Swedish upper secondary school system or international equivalent.

## Continuation Requirements

The following requirements need to be met:

For students to proceed to the second semester within the program: The student must not fall behind more than 15 credits.

For students to proceed to the third semester within the program: The student must not fall behind more than 15 credits.

For students to proceed to the fourth semester within the program: The student must not fall behind more than 15 credits. The credits from the first year's thesis course must have been

registered.

### **Qualification Requirements**

To obtain the Master of Social Science (120 credits) with a major in Media and Communication Science, the student must complete the course requirements of at least 120 credits at the higher education level that were not used for the bachelor's degree, with at least 90 credits overall in second-cycle courses and at least 60 of those second-cycle credits in Media and Communication Science, including a 30-credit master's thesis or two 15-credit master's theses in Media and Communication Science.

Requirements to complete the programme are (1) completing the requirements for the Master of Social Science (120 credits) with a major in Media and Communication Science and (2) completing all courses that are listed as mandatory courses in the Contents section, or their equivalent.

The degree certificate will be issued after formal application from student.

### **Quality Development**

The programme is evaluated at the end of the second semester as well as at the end of the fourth semester. This evaluation work is carried out in collaboration between students and the programme director. Each course is also evaluated according to the regulations and guidelines for first, second and third cycle education at Jönköping University.

### **Other Information**

The programme aims for an equal share between Swedish and International as well as male and female students in order to obtain the best student environment as possible. The programme is collaborating with the research environment Sustainable Communication at the School of Education and Communication at Jönköping University. The programme has a ambition to collaborate with strategic partner universities in order to broaden the perspectives and opportunities for the students.
