

COURSE SYLLABUS

BIM 1 Modelling and Presentation, 6 credits

BIM 1 Modelling och presentation, 6 högskolepoäng

Course Code: T1BG17	Education Cycle: First-cycle level
Confirmed by: Dean Feb 1, 2017	Disciplinary domain: Technology (95%) and social sciences (5%)
Revised by: Director of Education Feb 2, 2018	Subject group: BY1
Valid From: Aug 1, 2018	Specialised in: G1N
Version: 2	Main field of study: Civil Engineering

Intended Learning Outcomes (ILO)

After completing the course, the student shall:

Knowledge and understanding

- display knowledge of basic drawing standards and modelling
- display basic knowledge regarding regulations for the exchange of information, information deliveries, between parties in the construction process / management
- display basic knowledge of digital collision control facilities

Skills and abilities

- demonstrate the ability to use drawing and presentation standards in the construction industry
- demonstrate the ability to use digital information technology in modeling and drawing as well as presentations in the subject area (BIM)
- demonstrate the ability to model a simple building based on constructive, material and design aspects
- demonstrate the ability to document and report construction documents in a BIM system

Contents

The course provides basic skills in drawing standards and digital building information modeling as well as an insight into the use of collision control programs. It also provides basic knowledge of the constructive design of a small building regarding technical aspects, as well as basic skills in presentation technique. The course also provides basic knowledge of digital delivery management.

The course contains the following elements:

- Drawing standards
- Object-oriented modeling
- Creation of 2D drawings from a 3D model
- Modeling and presentation of a simple building
- Digital information delivery
- Collision control

Type of instruction

The teaching is conducted through lectures, exercises, and project work

The teaching is conducted in English.

Prerequisites

General entry requirements and Physics 2, Chemistry 1, Mathematics 3c. Or: Physics B, Chemistry A, Mathematics D (or the equivalent).

Examination and grades

The course is graded Fail (U) or Pass (G).

The final grade will only be issued after satisfactory completion of all assessments.

Registration of examination:

Name of the Test	Value	Grading
Project Work	5 credits	U/G
Tests	1 credit	U/G

Course literature

The literature is preliminary until one month before the course starts.
